

**Features**

*A Breakthrough Alternative to Four Lamp Fixtures*

*Superior Light Quality, 93.8 % Photometric Efficiency*

*Enhanced Merchandise Presentation*

*Low Maintenance Costs*

*Low Energy Consumption (77 - 87 Watts)*

**Technical Data**

**Socket Bars:** 0.032" pre-painted cold-rolled steel. Pre-punched for lampholders and quarter-turn fasteners. Designed to "snap-into" existing slots in fixture channel.

**Reflector:** The reflector can be ordered with an 85% reflective anodized finish, a 95% reflective enhanced or film finish, or a 92% reflective white enamel. The substrate is 0.020" high quality aluminum. The reflector profile is optimized using computer analysis and manufactured using state of the art CNC equipment. A protective pre-mask is applied to all reflective surfaces prior to manufacture.

**Installation:** For retrofit, the existing ballast and socket bars are removed. With the new ballast installed, the ESI socket bars simply snap into place in the existing channel. The reflector is positioned between the socket bars and attached with quarter-turn fasteners.

**Installation**

**Highlights**

Premium quality cam-lock lampholders

Low energy consumption (77-87 Watts)

Computer designed, CNC formed 0.020" specular aluminum reflector

Secure, quarter-turn reflector attachment

Ordering Information - \*\*\* Kits do not include lampholders unless they are added as an option \*\*\*

Part Number = Fixture Size + Reflector Material + # Lamps + Lamp Wattage + Voltage + Ballast Type

(Example K-18EASS332277N = 1'x8' Slim Strip Kit with an enhanced aluminum reflector, 3-32W lamps, 277 volts, and a standard power ballast)

Size	Reflector	Design	# Lamps	Wattage	Width	Options
K-14 - 1' x 4' Kit	EA - Enhanced Alum	SS - Slim Strip	1*	32	4.25"	LEV - Standard Lampholders
K-18 - 1' x 8' Kit	AA - Anodized Alum		2*		4.50"	BJB - Twist-lock Holders
	WR - White Enamel		3		4.75"	
					5.00"	

\* 1 and 2 Lamp option for 1' x 4' Kit
